Company background

About Tortoise Index Solutions

Tortoise Index Solutions provides research-driven indices that can be used as a realistic basis for exchange-traded products and thought leadership in the universe of essential assets. Its indices are intended to fill a void in the market and provide benchmarks and investable asset class universes for use by investment professionals, research analysts and industry executives to analyze relative performance as well as to provide a basis for passively managed exchange-traded products.

Index introduction

The Tortoise MLP Index® is a float-adjusted, capitalization-weighted index of energy master limited partnerships (MLPs). The Index is comprised of publicly traded companies organized in the form of limited partnerships or limited liability companies engaged in the transportation, production, processing, and/or storage of energy commodities.

Security data

Reference documentation

The following documents are used to calculate shares outstanding

- Press releases
- Annual reports pursuant to Sections 13 and 15(d) of the Securities and Exchange Act of 1934 (10-K, 20-F) and Parts 4, 5 and 6 of National Instrument 51-102 (AIF)
- Quarterly reports pursuant to Section 13 and 15(d) of the Securities Exchange Act of 1934 (10-Q, 6-K) and Parts 4 and 5 of National Instrument 51-102 (IFS)
- Certain registration statements pursuant to Rules 415 and 462 of the Securities Act of 1933 (S-1, S-3)
- Prospectuses and prospectus supplements pursuant to Rule 424(b)
- Proxy statements pursuant to Section 14(a) of the Securities Exchange Act of 1934 (DEF 14A)
- Current reports pursuant to Sections 13 and 15(d) of the Securities Exchange Act of 1934 (8-K, 6-K)

Shares outstanding

The shares counted for index calculation are shares outstanding, and are essentially “basic shares” as defined by The Financial Accounting Standards Board (FASB) in Generally Accepted Accounting Principles (GAAP). This count is float-adjusted to reflect only available shares. Changes in a company’s shares outstanding (and float changes), to include those due to mergers and acquisitions, greater than 5% are applied on a weekly basis by the index calculation agent. All other de minimis changes are accumulated and implemented with quarterly share rebalancing and annual float updates.

Index detail

The Index level is calculated on both a price-return and a total-return basis. The real-time Index level for the price-return version of the index is available from major market data providers under the ticker “TMLP.” The total-return Index level is calculated at the end of each trading day and is available under the ticker “TMLPT.” The Index is independently calculated by S&P Dow Jones Indices with a base level of 100 as of December 31, 1999.

Constituent eligibility criteria

Index constituents may include the following equity securities: 1) interests in energy MLPs as defined by the National Association of Publicly Traded Partnerships (NAPTP); and 2) equity securities of energy MLP affiliates, including MLP I-Shares (indirect ownership interests in MLPs issued by MLP affiliates and referred to herein as “MLP Affiliates”).

Index eligibility To be eligible for inclusion in the Tortoise MLP Index, a company must be publicly traded and meet the following eligibility requirements:

Market capitalization Companies must have a total equity market capitalization of at least US \$200 million at the time of inclusion in the Index. To remain in the Index, a company must maintain an average equity market capitalization of at least US \$175 million for a minimum of 20 trading days prior to rebalance reference dates.

Domicile Companies must be listed on the New York Stock Exchange, NASDAQ, or NYSE MKT.

Distribution Companies must pay a distribution greater than or equal to their minimum quarterly distribution (MQD) at the time of inclusion in the Index. NOTE: The market capitalization and distribution criteria were applied to the Index beginning with the December 2008 rebalance.

Index construction and maintenance

Index calculation equations

The index is calculated by S&P Dow Jones Indices using the following equations:

[Initial Divisor] = [Base Date Index Market Capitalization] / Base date index value (not necessarily 100)

[Index Value] = [Index Market Capitalization] / Divisor

[Post-Rebalance Divisor] = [Post-Rebalance Index Market Capitalization] / [Pre-Rebalance Index Value]

For a more detailed explanation of these equations please refer to the Capitalization Weighted Indices section of the S&P Dow Jones Indices' Index Mathematics Methodology which can be found at <http://us.spindices.com/>.

Index rebalancings

The Index is rebalanced quarterly on the third Friday of each March, June, September and December, and rebalances are effective at the open of the next trading day. In the event major US exchanges are closed on the third Friday of March, June, September or December, the rebalancing will take place after the market close on the immediately preceding trading day. Reference dates for rebalancing are nine calendar days prior to the rebalance dates. Underlying constituent shares and constituent caps will be applicable as of the reference dates. As such, due to market fluctuations between reference dates and rebalance dates, constituent caps may not hold on the rebalance dates.

Corporate actions (such as stock splits, stock dividends, spin-offs and rights offerings) are applied after the close of trading on the day prior to the ex-date. Share changes resulting from exchange offers are made on the ex-date.

At rebalance reference dates, no individual constituent may exceed 7.5%. Should a constituent exceed 7.5% at the reference date as a result of market cap, the weight in excess of 7.5% will be reallocated across the index to all other constituents with weights below the 7.5% threshold, pro rata based on their market cap. Additionally, affiliated MLP families in aggregate may comprise more than 15% of the Index. Should affiliated MLP families in aggregate comprise more than 15% of the index at the reference date, the affiliated names will be adjusted based on their pro-rata market capitalizations and capped at a combined weight of 15%, with excess weight reallocated across the index to all other constituents pro rata based on their market cap.

Additions No companies will be added to the Index between rebalance dates.

Deletions Between rebalance dates, a constituent can be deleted from the Index due to corporate events such as mergers, acquisitions, bankruptcies, takeovers or delistings.

Industry classifications Constituents will be reviewed annually, at the December rebalance, to determine the appropriate subsector classification.

Treatment of dividends and distributions

The price return index does not account for cash dividends or cash distributions. The total return index accounts for cash dividends or cash distributions by reinvesting them across the Index after market close on the ex-date. Stock dividends are treated as corporate actions and result in offsetting adjustments to price and units outstanding.

Base date

The base date for the Index is December 31, 1999, with a base value of 100.

Index dissemination

The real-time Index level for the price return version of the Index is available from major market data providers under the ticker “TMLP.” The total return Index level is calculated at the end of each trading day and is available under the ticker “TMLPT.” For index values, constituents and announcements regarding constituent changes, please visit www.tortoiseindexsolutions.com.

The Index is calculated daily throughout the year. The Index is not calculated on days when U.S. and Canada exchanges are officially closed.

In situations where an exchange is forced to close early due to unforeseen events, such as computer or electric power failures, weather conditions or other events, the closing price of the Index will be calculated based on (1) the closing prices published by the exchange, or (2) if no closing price is available, the last regular trade reported for each stock before the exchange is closed. In all cases, the prices will be from the exchange listing included in the Index. If an exchange fails to open due to unforeseen circumstances, the Index will use the prior day’s closing prices. If all exchanges fail to open, the Index may not be published for that day.

Classifications

Industry classifications

Tortoise Index Solutions, LLC will review each constituent’s sources of revenue, EBITDA, cash flow and net income, along with the company’s asset mix, to determine the appropriate subsector classification. The final determination is at the discretion of Tortoise Index Solutions, LLC.

The companies in the Tortoise MLP Index® are categorized into the following subsectors and respective subsector indices based on the criteria described above:

Coal (TMLPCOAT)

Coal MLPs are either involved in the direct mining, production and marketing of coal or the ownership and management of coal reserves.

Crude Oil Pipelines (TMLPCOPT)

Crude Oil Pipeline MLPs are involved in the transportation of crude oil and other liquids.

Gathering & Processing (TMLPGNPT)

Gathering & Processing MLPs are engaged in some or all of the following activities: gathering, compressing, dehydrating, treating, processing and marketing of natural gas, and fractionating of natural gas liquids (NGLs).

General Partners (GPs) manage a partnership’s operations and generally maintain a 2% economic stake in the partnership. Traditionally, GPs also receive Incentive Distribution Rights (IDRs).

Marine Transportation (TMLPMATT)

Marine Transportation MLPs transport liquefied natural gas (LNG), crude oil, refined petroleum products, or chemicals and provide other marine transportation services.

Natural Gas Pipelines (TMLPNGPT)

Natural Gas Pipeline MLPs are involved in the transportation and/or storage of natural gas and natural gas liquids (NGLs).

Oil & Gas Production (TMLPOGPT)

Oil and Gas Production MLPs are involved in the acquisition, production, and development of oil and natural gas reserves.

Propane (TMLPPROT)

Propane MLPs are typically engaged in the sale, distribution, and retail (and wholesale) marketing of propane and other natural gas liquids.

Refined Products Pipelines (TMLPRPPT)

Refined Products Pipelines MLPs are involved in the transportation, terminalling, and storage of refined petroleum products. Refined petroleum products include gasoline, diesel, jet fuel, kerosene, and heating oil.

Additional sub indices**Long Haul Pipelines (TMLPLHPT)**

Refined Products Pipelines MLPs are involved in the transportation, terminalling, and storage of refined petroleum products. Refined petroleum products include gasoline, diesel, jet fuel, kerosene, and heating oil.

Midstream (TMLPMIDT)

The Midstream Sub Index is comprised of all constituents included in the following subsector indices: Crude Oil Pipelines, Gathering & Processing, Natural Gas Pipelines, and Refined Products Pipelines.

Upstream (TMLPUPST)

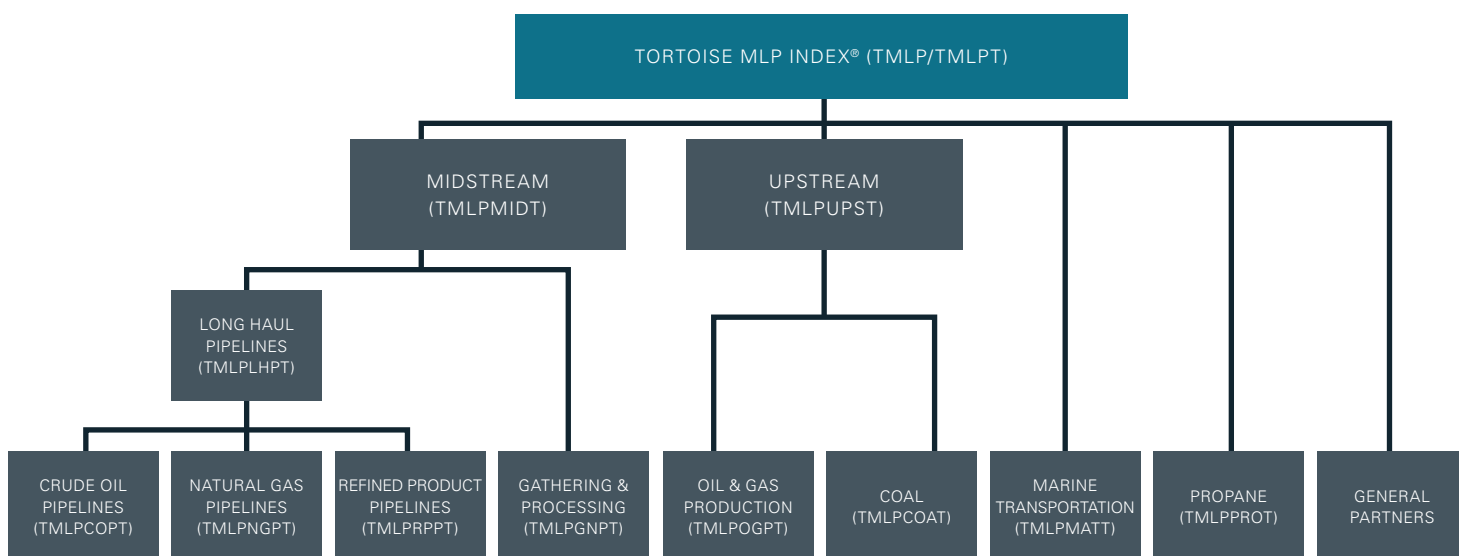

The Upstream Sub Index is comprised of all constituents included in the Coal and Oil & Gas Production subsector indices.

Index hierarchy

Tortoise MLP Index® The Index will be calculated on both a price-return and total-return basis. The price-return index will be available in real time while the total-return index will be priced at the end of each trading day.

Sub indices

Each sub Index will be calculated on a total return basis and will be priced at the end of each trading day.

**Index Committee**

The Index Committee oversees the integrity of the rules and provides clarifying guidance on the rules-based methodology where required, although every effort is made to ensure the rules are clear and non-discretionary; approves quarterly rebalances and directs public announcement relating to the indices. Members

Appointment of members: The Index Committee will consist of between three to five voting members, one of whom will act as Chair.

No remuneration: For their particular work on the Index Committee, Index Committee members will not receive a salary or other financial remuneration (or any benefit in kind).

Meetings, quorum and voting

Tortoise Index Solutions shall provide at least 5 business days advance written notice to each Index Committee member.

“Quorum” is defined as:

- The Chair; and
- at least one other Index Committee member.

Voting: Each Index Committee member shall be entitled to one vote at each Index Committee meeting.

All motions or matters before the Index Committee may be carried by simple majority.

Confidentiality

Matters discussed or handled by the Index Committee will be considered confidential until such time as they are made public. Without limiting the generality of the foregoing, the minutes of the Index Committee are confidential information and may not be discussed with anyone outside of the Index Committee without the prior written approval of the Chair and the Chief Compliance Officer of Tortoise Index Solutions. Decisions by the Index Committee regarding rules, ambiguous cases or discretionary additions or deletions from indices may be made public via such mechanic (internet or otherwise) as the Company decides from time to time.

Conflicts of interest

Any Index Committee member who has a conflict of interest with respect to an issue before the Index Committee must excuse him/herself from participating or voting in relation to that issue. In participating in the Index Committee’s activities, all Index Committee members will aim to observe the highest standards of market practice, avoid appearances of impropriety, and remain mindful of their regulatory responsibilities surrounding issues such as market abuse, dealing ahead and insider trading.
